
Overheard at the Attendance Form

1/29: If you were a celestial body, how close would a person have to get before they were tidally disrupted?

- about two radii
- yes.
- past the nono square

1/31: Would you rather fight one black hole-sized neutron star or ten neutron-star-sized black holes?

- ten neutron star sized black holes--- could pit them against each other and have them eat each other (1black hole+1 black hole= 0black holes?)
- I ate a burrito today.

2/5: Craziest theory for what dark matter is:

- \varnothing
- The souls of Berkeley students :)
- `<iframe width=500 height=570
frameBorder="0"
src="https://www.dwitter.net/e/6723"
allowFullScreen="true"></iframe>`

2/7: What is your favorite coding language and why is it Python?

- Python because it's a snake and peanut butter doesn't go well with cars
- python--because my anaconda don't lie
- None, I hate them all

2/12: The universe ended as it began, not with a bang but with a

- Whimper
- whimper
- whimper in the wind
- Makena Fetzer
- rip

2/14: Appropriate response to someone calls you an astrologer?

- Calmly but firmly ask them to leave the premises
- Pls
- ￣_(\ツ)_/￣

2/21: Limit of happiness as number of midterms goes to infinity

- Sad :(
- Romain Hardy
- You just use L' Hospitals. You get there in L'Ambulance.

2/28: If you could name an astronomical object, what object would you name, and what name would you give it?

- I would rename the moon. It would forever be known as the butt.
- the sun, I would name it something really plain-- like Bob, and expect everyone to call it by that like it was a totally normal term

3/5: What clever question should we ask on Wednesday?

- idk
- What clever question should we ask Monday?
- Why can't I write "Romaln Hardy?"

3/7: Describe this class in a single sentence, but alliterate it.

- Patient python programming provides particularly pretty plots.
- Romain hardy romain hardY.

3/12: How bothered are you that 131 Campbell was double booked?

- poop emoji
- Vincent van Gogh
- Hella
- excited until I realized we still had class

π : What is your favorite kind of π ?

- Never ending
- space time pi
- 3.14159265stevenhawkingromainharding

3/19: Come up with an original acronym for the stellar classification spectral types (O, B, A, F, G, K, M).

- Oh boy a free green killer mango
- OJGIHK
- learning latex today

3/21: If you could make any scientist the president, who would it be?

- Dr. Phil
- chancellor dirks
- Romain Hardy

4/2: The most astronomical thing you did during spring break:

- Ate an astronomical amount of sushi
- I went to the moon
- Looked at the moon
- stayed up till 4 am

4/4: If you could change one dumb physics/astronomy convention, which one would it be?

- the earth is flat
- The Flat Earth Society Convention
- Call Einstein's equations "Matthew's Equations"

4/11: This semester I...

- Pythoned
- took an L but tonite I bounce back
- AM A BUG

4/16: The craziest thing that people actually believe:

- teachers won't curve a class with an F average
- JEsUsUs is aLivEEee ````1/.
- That there isn't a coffee shop in dwinelle

4/18: What are you most looking forward to this summer or for next semester?

- upper div astro! yay!
- going home and being in the warmth and sunshine
- where I'm living (house for the summer, coop)
- I'm getting married!

**THANKS EVERYONE FOR A
GREAT SEMESTER :)**
